Technical Skills

Languages: Python, C, Java, Assembly (Motorola 68000), Javascript, HTML, CSS
Frameworks: React, React Native, Vite
Backend & Databases: Node.js, Supabase (PostgreSQL), Google Firebase
Technologies/Tools: Docker, GitHub, Vercel, Cursor, Claude, Expo, Figma, Windows, Linux, Easy68k

Education

Bachelor of Computing in Computer Science (Co-op) **Sept 2024 – Present**
University of Guelph *Guelph, Ontario*

- Completing a minor in Neuroscience
- Relevant Coursework: Operating Systems, Data Structures, Object Oriented Programming, Software Systems Development and Integration, Structure and Application of Microcomputers, Web Design & Development, Statistics

Personal Projects

Contact-A-Roo! | *React Native, Javascript, Google Firebase, Expo, Figma* **April 2026 – Present**

- Developing a cross-platform mobile application using React Native and Expo to help contact lens users track wearing schedules and manage lens inventory effectively.
- Implementing Firebase for data storage and user authentication, ensuring seamless synchronization across devices.
- Designing user interface using React Native and Figma, taking full ownership of the project from concept to implementation while ensuring maintainable code architecture and thorough testing with Expo GO.

Hera+ | *ElleHacks 2026 | React + Vite, Node.js, Supabase, Presage SDK, Google Gemini API, Docker* **February 2026**

- **Won 2nd place overall at ElleHacks 2026** by developing a women's healthcare advocacy platform that addresses the 29% dismissal rate women face in medical appointments through AI-powered symptom analysis and vital tracking.
- Integrated Presage body scanning SDK and Gemini API with Node.js backend and Supabase database to generate timestamped health reports with AI-driven insights, enabling users to track symptoms and advocate during doctor visits
- Containerized application with Docker for Linux OS compatibility and collaborated with 4 developers using Git/GitHub, deploying cross-platform functionality within a 36-hour timeframe.

LockIn | *HackHive 2026 | React + Vite, Node.js, Google Gemini API, Supabase, Figma, Vercel* **January 2026**

- Collaborated with team of 3 to build matchmaking platform using React, Node.js, and Supabase database, creating customizable profiles with community-specific filters to provide safer gaming spaces for marginalized Valorant players facing toxic behavior.
- Implemented full-stack matchmaking flow with AI-assisted discovery and accept/decline functionality, enabling secure connections between players through Riot ID and Discord username sharing for coordinated gameplay.
- Designed cohesive visual identity and intuitive UI/UX using Figma, Aseprite, and Clip Studio Paint, creating custom assets and user flows that enhance accessibility and engagement for underrepresented gaming communities.

Technical Extra-Curricular / Volunteer Experience:

University of Guelph Robotics Team **Sept 2024 – Present**
Website Developer *Guelph, Ontario*

- Developing UGRT website for the yearly Canadian International Rover Challenge by collaborating with a team of 6 on wireframes, site architecture, and frontend implementation using HTML, CSS, and Python to showcase team achievements and rover projects.
- Creating responsive user interfaces using Figma and coordinating with development team via GitHub for version control, contributing to iterative improvements through regular hybrid development meetings.

Google Developer Groups **Sept 2024 – Dec 2024**
Technical Workshop Assistant *Guelph, Ontario*

- Mentored 50+ workshop participants across web development and Kickstart workshops, delivering real-time technical support for HTML, CSS, React, and VS Code challenges while fostering an engaging and inclusive learning atmosphere.

Non-Technical Extra-Curricular / Volunteer Experience:

Events Team Executive & Vendor Coordinator **Sept 2024 – Present**
Anime Club Genshiken + Ākēdo Festival *Guelph, Ontario*

- Planning and executing weekly campus events by coordinating with events team on logistics, room booking, and promotion, supporting anime community engagement and growing club membership.
- Secured 20+ vendors for university-hosted Ākēdo Festival anime convention through outreach and coordination with subteams, ensuring diverse vendor offerings and successful event execution.
